# 'LightMaster' Configuration Tools

LM8000D Neon 80 Channel Dimming programmable controller.

'LightMaster' Software editing suite (above)
Cold Cathode installation (below)

Features:

Sophisticated and Intelligent software for programming 'LightMaster' Controllers.

Ease of use makes programming fun for us or you.

Endless results change light patterns in minutes.

Control the animation for internal and external installations.

Bespoke software and hardware written and built to your needs.

The 'LightMaster' configuration tools are a Windows based software giving an easy to use and friendly interface to the 'LightMaster' Programmable Lighting Controller.

Drive and Dim Incandescent and Cold Cathode Lamps smoothly.

Add multicoloured tubes to create large scale colour mixing and smooth colour changing.

Use the tools to chase, fade and strobe patterns.

Test the patterns you have created prior to downloading to the controller.

All of the 'LightMaster' control systems can be programmed by the LightMaster configuration tools.

Customise and change any set of sequences to be blended together to form a complete custom effect which can be fast and furious or smooth and sensuous.

All software and hardware has been developed by Select Software.

Full custom solutions for Architectural Lighting Schemes that need that something extra.
